DISTINCTIVE TRACKS AND POLES LTD

PRICE LIST 2023

PRICING

Prices for items on pages 4-17 are shown as trade Prices (EXC V.A.T)

Prices for items on Pages 20—33 are shown as RRP (EXC V.A.T), subject to pre arranged discount.

VAT

All prices shown are excluding V.A.T.

V.A.T will be charged at the current rate in force at the time of dispatch (20% at the time of printing)

FAULTY GOODS/INCORRECT ORDERS

Written claims for the above must be made within 2 days of receipt of goods. Any damages to packaging must be notified to the courier upon delivery and then on to us.

RETURNS

We do not accept any returns unless we have given you prior written consent. Subject to our standard terms and conditions.

CREDIT ACCOUNTS

Credit accounts may be granted subject to the satisfactory completion of our account application form and the receipt of satisfactory references.

LEAD TIMES

Stock items— immediate (Subject to availability)

Standard made to measure items— 3 working days

Bent tracks— 5-7 working days

Motorised items—7-10 working days

Blinds with fabric — 10-14 working days (Subject to fabric availability)

Any delays will be communicated to you as soon as possible.

Full terms and conditions available upon request.

DELIVERY

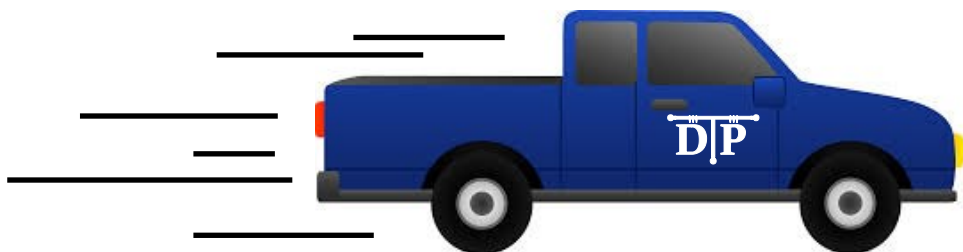

As a further extension of our highly regarded customer service, we offer deliveries of all items on our own van within the Birmingham/Worcestershire locales, every Friday. This allows us to liaise directly with you regarding estimated delivery times and keep you updated with any changes. If you're a regular customer you'll always know when your items will be with you.

We do also offer a next day courier service (subject to made to measure lead times). Which covers the greater midlands area. If you are out of our usual delivery run area or require delivery on an alternative day, we can send items to you via courier. Addresses outside of the greater west midlands may incur longer delivery times.

Special order items may be subject to extra charges, these will be communicated to you at the time of ordering/Quoting

ORBUS 28/29MM MADE-TO-MEASURE METAL POLES

Our industry leading quality 29/28mm* poles are available in Stainless steel, Black, Antique Brass and Chrome. With a comprehensive choice of finials and brackets, this range is perfect for complimenting any contemporary home.

We primarily supply these poles made-to-measure, cut to your exact sizes in our workshop, we can also label items with the desired room/job to prevent any confusion on site.

The poles are available in stock lengths of:

1.5M (S/Steel, Chrome)

1.8M (Chrome, Black)

2.0M (S/Steel, Chrome)

2.4M (S/Steel, Chrome, Black)

3.0M (S/Steel, A/Brass, Black

5.0M (S/Steel)

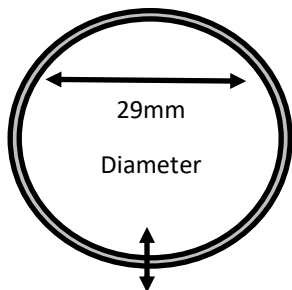

Chrome)

We can also supply you with a joining piece so that we can achieve almost any size.

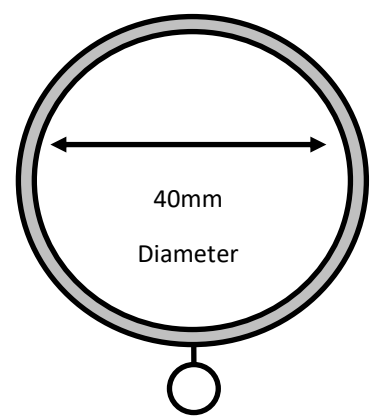

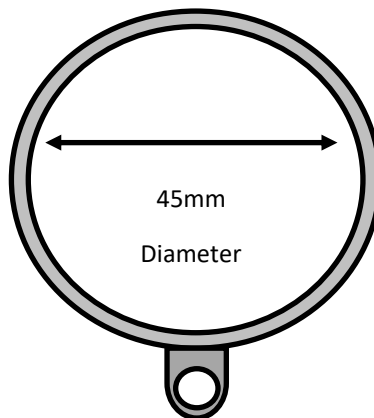

Tube

Standard rings

Flat lined rings

1.2mm Tube thickness, this is more substantial than most standard tubes which usually have a thickness of 0.8mm

These rings will compliment most contemporary, traditional or show homes.

*Currently Stainless steel and black poles are 29mm Diameter. Ant Brass and Chrome are 28mm Diameter

Roman Blind cassette system

The Distinctive Roman blind headrail range is incredibly sturdy, efficient and easy to use.

The headrail profile is a heavier gauge Aluminium than most of our competitors so it looks and feels more appealing than the average headrail. The system incorporates a plastic locking mechanism onto every spool, thus avoiding the need for screws which can damage the finish of the headrail profile and requiring minimal use of tools when fitting. An orange locking pin is also found on our spools which prevents the spools from spinning in transit and negates any possible tangling of the cords which may have occurred if the spools have not been locked in place.

We have a headrail only and complete kit option, many different colours of chain along with a selection of child safety solutions (please see overleaf)

Chain colours

(Also available to purchase in full reels of 150M if required)

Child Safety

At Distinctive we believe that child safety is of the upmost importance and therefore offer child safety components that have been thoroughly tested to achieve high safety standards. All of our child safety devices have been certified as safe by the British Blind and Shutter association to comply with the current child safety legislation.

Please bear the below in mind when ordering:-

When not using a chain break device the bottom chain loop must be at least 150CM from the floor and MUST also be attached to the wall using an approved chain retention device which will be provided with each headrail ordered. When using a chain break device the bottom chain loop must be at least 60CM from the floor in order to achieve this; an installation height is necessary when ordering, regardless of the utilisation. If the installation height is unknown, a maximum of 1M chain can be provided.

Fly Wheel Gear

- Internal breakaway mechanism
- 1:4 (10KGS) or 1:1 (3.5KGS) Control units
- No breakaway devices on the chain or wall mounted safety box needed
- Chains can be 60cms from the floor.

Chain Break connector

- External Breakaway Mechanism
- 1:1 Control Unit only
- 6.0kg Lifting Weight Capacity.
- No wall mounted Safety Box Needed
- Chains can be 60cms from the floor.

Rear cords.

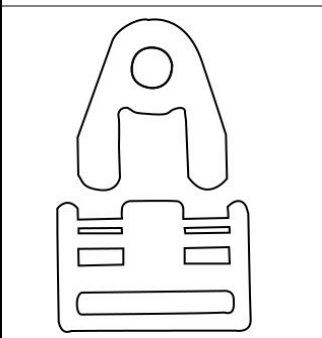

The folds to the rear cords must be a maximum of 20cm apart and have a breakaway at the bottom, if larger pockets are required you will need to use breakaway devices on each fold as below.

The cords must remain unknotted so that they may slip though the ball toggle which must also be attached to the blind via the cable ties included to prevent it dropping to the floor and becoming a choking hazard.

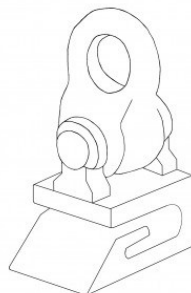

Clear ball toggle for rear cords.

- Rear cord Breakaway Mechanism
- 1:1 or 1:4 Control Units suitable
- 6.0kg Break limit.
- Pre-drilled hole to secure to blind which prevents the toggle dropping to the ground and becoming a choking hazard—supplied with cable ties.

Cord breaks for rear cords.

- Cord Breakaway Mechanism
- 1:1 or 1:4 Control Units suitable
- 6.0kg Break limit.
- Suitable for eyelet fixing (left) or pocket tape fixing (right)

Motorised Roman Blind cassette

Made to measure system Prices

Our made to measure motorised roman blind system utilises all of the same components from our chain operated system, including the 1.2mm gauge profile, locking clips on the spools and travel pins to prevent tangling during transit. These systems also include a lithium ion battery which has been tested for 500 lift/lower operations.

I-BEAM Hand drawn curtain track

Our signature I-beam track is strong and versatile, making use of universal brackets and roller gliders, this track is suitable for almost all light-medium applications.

Because of the way I-Beam is crafted and the malleability of aluminium; this track can be bent or reverse bent to suit almost any type of bay window and can be bent on site with ease, without the need for any tools.

I-Beam is supplied in contract lengths of 5M only. Fittings can be purchased in fittings pack to suit a 5M length or any combination of fittings you require.
